Just press the Fn key For example, to use the F12 key to change your volume, press Fn+F12.. As far as I know, there are no format styles supported by Evernote (there are none in the Windows client), at least at this time, so headings need to be done by hand: pick font face, since, boldness, etc.. That's why I asked about which client you were using As metrodon said, there are no differences in formatting capabilities between the free and premium versions.. The Mac, Windows and various mobile clients can differ as to capabilities, and ways to accomplish certain tasks.. You can capture the essential gist of a document in a bulleted list (or a numbered list for that matter).. Tips: • To display a column's measurements in the ruler when you resize the column, press Option with these shortcut keys.. Commands that require you to press multiple keys in order are indicated by a comma sign (,).
