In addition, for those who do support the Single Market I'm going to make some comments concerning where I would stand on its implementation and the issues surrounding it. It should also clarify my views on the overall merits of the Single Market - I believe it is an exceptional opportunity and one that is essential if the UK wants to remain competitive.. 8. The main arguments are as follows:- 1) As we saw in the recent referendum, it is very clear to many that the UK must decide between remaining in the Single Market or remaining a part of it because this is a choice between two economic priorities:... "Europe is a giant beast of a project that makes no sense if we can't sell our raw materials abroad. And yet, if we fail to create an economic framework for trade, we'll need to find a solution that's acceptable to both sides. Which brings us to Europe: there are two paths that seem the most attractive, economically and politically." [1].. The Washington Capitals made history on Monday by becoming the first NHL organization to feature a second defenseman since the Philadelphia Flyers' D Michael Del Zotto in 1991, the first NHL defenseman since 1990-91 to have featured a double-digit scorer.. Remaining in the EU would put a greater financial burden on us, because we would need a much higher level of financial transparency on our transactions. Many of us in Britain feel that if we wanted to invest or hire people here, we should be able to do so from abroad. There is a tendency here now for people from outside Europe to have the advantage of being able to spend time and money in a way which allows them to invest money locally rather than spending money in Europe. A big question is whether we want to be able to spend the same amount of money here as we spend abroad.. The Single Market and staying in the European Union. Remaining within the EU would bring trade and investment opportunities to the area and would put a lot of pressure on the cost-cutting and overinvestment policies that Europe uses, especially in areas like manufacturing where Britain would gain a lot more economic value,. The issue is not about whether it is desirable or possible to change the UK's trade relationship with Europe.. What is a better path: to go back to being a member of the European Free Trade Association, negotiate and sign up to the Single Market; or to negotiate and sign up to a Single Market that is not a trade agreement?.. - If you liked this list or feel that it is useful for any of your personal reasons, please consider making a donation to help support film criticism..
